ERRATUM

In the article by N. A. Khan, entitled, "Biological I, Oxidation, The Infrared Studies on the Lipoxidase-Catalyzed Oxidation of Linoleic Acid," Volume 44, May, 1953, pp. 247–249, the following corrections should be made:

P. 248, line 9 "heptane (Skelly F)" should read, "heptane (or, Skelly F)." Of course, Skelly C for heptane may be used. "(6250 meqpuiv./kg)" should read, "(6250 mequiv./kg, determined on the substance recovered from the solution)". This paragraph should have this important step, "Oxygen-free nitrogen was bubbled through all the samples as a measure of precaution against further oxidation, wherever it was necessary." Fig. 1*A* should indicate its ester character by absorption at 9.80 μ and *B* its acid character by its absence.
